Barrier installation at Northern Virginia construction site

An Economical Solution for your Temporary Safety Barrier Needs

The *per-foot, per-month* barrier rental rates of concrete barrier are *only a fraction of the purchase price*. Barrier rentals are available on a short term and long term basis. Concrete Safety Systems (CSS) will deliver, set and pick-up barrier where you want it, when you want it, for as long as you want it. *When you rent from CSS there is no maintenance, no extra handling, and no storage.*

Need your Barrier Right Away?

CSS maintains a stock of thousands of feet of barrier to meet your immediate barrier needs. Installation crews and equipment are ready to start setting your barrier right away. Two workers and one piece of equipment can install 6,000 feet in one shift.

When you Rent with CSS, you can Leave the Hassle to us

- Don't waste valuable real estate storing and repairing concrete barrier.
- Avoid the trouble of finding extra labor or tying up your labor resources setting and removing barrier.
- Escape the headaches of finding trucks and reliable truck drivers, scheduling and tracking deliveries. *CSS will deliver and pick up all the barrier you need at your work site. Our efficient delivery fleet assures you of prompt service for large and small quantities of barrier.*
- Free up your equipment that would have been used to finish your job on schedule.
- Don't tie up valuable capital, buying barriers.

J-J Hooks® Concrete Barrier Uses

- Controls vehicular and pedestrian traffic for major events, conferences and concerts.
- When used as a temporary traffic barricade it provides a safe, well-defined buffer zone for highway construction and equipment. The efficiency of work crews increases as they work in complete safety from highway traffic.
- When you have temporary security needs, the J-J Hooks® security fence feature provides a higher level of security than any other temporary measure.
- Close off potentially dangerous areas such as foundations, propane tanks, excavated areas, damaged guardrails and damaged bridges.

Testimonials

Nuclear Safety Summit

Ajay R. Patil & A. Blayne Candy, Showcall, Inc.:

"You and the great staff at Concrete Safety Systems make for a perfect fit for the Showcall Team, as we all share a **commitment to excellence**, an **unwavering work ethic** and a flexible approach to the seemingly unending stream of changes to design and plans. This summit, like others, posed its own set of challenges, including a fluid design process and an extremely short load out schedule. But again, as always, Concrete Safety Systems and the rest of the Showcall Team rose to the challenge and **exceeded expectations.**"

Highway Construction Project

Joe Steven, Superintendent, Ajax Paving Co.:

"... we're **very impressed** with the way this project is going with the use of J-J Hooks road barriers."

Single face bridge parapet, Route 123, Occoquan, VA
